Election/Restrictions

Applicant has canceled all previously examined claims and introduced all new claims. Applicant's species election of FF-MAS in the response of 7/10/06 is still in effect. Because of the introduction of new claims and claim elements never before present in the claims, a new election is required.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 44-49, 51-55, 59, drawn to the use of an additive belonging to the class of gonadotropin in a process of *in vitro* fertilization, classified in class 435, subclass 1 and others.
- II. Claims 44-50, 56, 59, drawn to the use of a growth factor in a process of *in vitro* fertilization, classified in class 435, subclass 1 and others.
- III. Claims 44-47, drawn to the use of compounds inhibiting sterol $\Delta 14$ reductase in a process of *in vitro* fertilization, classified in class 435, subclass 1 and others.
- IV. Claims 44-47, drawn to the use of compounds inhibiting 4,4-dimethyl-5 α -cholest-8,24-diene-3 β -ol 4-demethylase in a process of *in vitro* fertilization, classified in class 435, subclass 1 and others.
- V. Claims 44-47, drawn to the use of compounds activating cytochrome P450 lanosterol 14 α -demethylase in a process of *in vitro* fertilization, classified in class 435, subclass 1 and others.
- VI. Claims 44-47, 57-59, drawn to the use of compounds with an amphotericin like effect in a process of *in vitro* fertilization, classified in class 435, subclass 1 and others.

The processes are distinct from one another because they recite the use of different and distinct compounds in Groups I, II, III, IV, V, VI which compounds do not all belong to an art accepted grouping.

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the

reasons given above and there would be a serious search and examination burden if restriction were not required because the following reasons apply:

(c) the inventions require a different field of search (for example, searching different electronic resources, or employing different search queries);

(d) the prior art applicable to one invention would not likely be applicable to another invention;

(e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment

of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
